Cave de Turckheim Pinot Blanc, AOP Alsace [Organic] 2023

FAL264 CAVE DE TURCKHEIM ALSACE, FRANCE

PRODUCTION

Cave de Turckheim has been a pioneer of organic viticulture in Alsace, actively supporting a number of their growers decision to convert in 2008. These winegrowers have revived ancestral practices, tilling the soil and undertaking work that facilitates the elimination of weeds and helps to combat disease. Natural fertilisers are also used (nettle, horsetail, comfrey and dandelion), fortifying the vines and increasing their natural resistance. Organic winegrowers meticulously observe their vines, enabling them to intervene in the right place and at the right time, rather than treating the plants systematically. With the first vineyards achieving organic certification in 2011, Cave de Turckheim now has 35ha of certified vineyards and combined with those of their sister winery Cave du Roi Dagobert, means they have the largest organic vineyard holdings in Alsace.

TASTING NOTE

Fresh and fruity nose with hints of white flowers. Dry, well-balanced with good weight on the palate, crisp and supple with aromas of apples and lemon.

FOOD MATCH

Works well as an apéritif and a versatile food match, try with asparagus risotto, salads and light chicken dishes.
